Treatment/Coating Details			
Weight	g/m²	100	±10%

100g/m<sup>2</sup> Graphite/silicone solution evely distributed across both sides

## Comments

The graphite solution increases the fabric temperature resistance, and can improve its performance where flexing is involved.

Glass fibre is inherently non-flammable, and the finished product is non-combustible.

If you have any technical queries please feel free to phone us: 01422 311 607.

THS Industrial Textiles Ltd reserves the right to alter any of the elements quoted in the above specification without prior notice. Please note that the above information is given in good faith and should be considered as a guide only, if any values in this specification are of critical importance then we strongly recommend the user arranges independent testing themselves. Test methods mentioned are considered as guides only, actual methods may differ slightly in practice. Suitability of the product for all applications is at the discretion of the user, as are any potential patent infringements relating to specific applications.

<sup>\*</sup>Base fabric will withstand 600°C (unstressed), melting point >800°C
